THE FREE ONLINE ROOM PLANNER

Do you have strong feelings in regards to your kitchen or bath design but don't have the budget to work with a professional designer? Or do you just know what you like when you see it but don't have the time or patience to spend picking out color palettes and tile patterns?

We may have the ideal kitchen and bath remodeling solution for you.

[Design in a Bag](#) aims to provide you with a curated collection of kitchen or bath design recipes that have been pulled together by an interior designer for minimal cost. You can browse their website via [style or color](#) for online galleries of coordinated kitchen and bath looks that have all been designed and crafted by Rebekah Zaveloff from KitchenLab and HGTV.

Each kit contains complete concepts including cabinet, countertop, tile and paint samples, shopping list and hand-drawn renderings. This will allow you to touch, see and feel the materials before committing large dollars into materials.

****UPDATE****

We've teamed up with Design in a Bag and they are offering a bag of your choice to the winner of this weeks Giveaway!
